TEACHER PREPARATION

The Teacher prepares an audio file. The audio file could be a recording of a phone message left by a friend explaining what he/she will do this weekend.

Unfortunately parts of several sentences are missing. The conversation should take place in a setting related to a unit recently studied in class.

STUDENT PREPARATION

Students will need to review the verbs, in their different forms, used to report a story

IN THE LAB

OPEN FILE

The teacher will **SEND** the audio file to all students. Students listen to the recording and prepare a phone message for another friend. In that message they will report on the plans they just heard about and ask their friend to join them. Students will need to complete the missing parts of the first recording in order to prepare their message.

RECORD

Students press **RECORD** button (**Student SOLOIST**) and record their message.

COLLECT RECORDINGS

Teacher uses the **COLLECT RECORDING** feature to close students' audio files and collect them in one file folder for comprehension, proficiency and/or grading.

FOLLOW-UP

Teacher will use the **CONFERENCE** function so that students can compare their interpretation to the original message with the missing sentences.
